Instructions

This Script will help ease the laborious task of downloading data from Pascal Voc datasets used mainly in computer vision tasks. I have written the script for logos in the wild dataset, a very popular logos dataset, you can use it for any other Pascal Voc dataset

This script is meant to be ran on Google Colab. You will need to upload the provided CSV file on Colab first so that it looks like the image shown below. You will also need to have your dataset uploaded on google drive beforehand.
